

# Table of Contents

<b>Preface</b> .....	<b>v</b>
<b>About the Authors</b> .....	<b>vi</b>
1. Allogeneic and Autologous Blood Donor Selection .....	3
2. Whole-Blood Collection and Component Processing .....	25
3. Blood Component Collection by Apheresis .....	47
4. Infectious Disease Screening .....	57
5. Hospital Storage, Monitoring, Pretransfusion Processing, Distribution, and Inventory Management of Blood Components .....	77
6. Molecular Biology and Immunology in Transfusion Medicine .....	91
7. Blood Group Genetics .....	111
8. ABO, H, and Lewis Blood Groups and Structurally Related Antigens .....	127
9. The Rh System .....	149
10. Other Blood Group Systems and Antigens .....	157
11. Pretransfusion Testing .....	175
12. Identification of Antibodies to Red Cell Antigens .....	185
13. The Positive Direct Antiglobulin Test and Immune-Mediated Hemolysis .....	203
14. Platelet and Granulocyte Antigens and Antibodies .....	223
15. The HLA System .....	241

16.	Hemotherapy Decisions and Their Outcomes . . . . .	259
17.	Administration of Blood Components . . . . .	281
18.	Perinatal Issues in Transfusion Practice . . . . .	291
19.	Neonatal and Pediatric Transfusion Practice . . . . .	301
20.	Patient Blood Management . . . . .	313
21.	Transfusion Support for Hematopoietic Stem Cell Transplant Recipients . . . . .	331
22.	Noninfectious Complications of Blood Transfusion . . . . .	337
23.	Approaches to Blood Utilization Auditing . . . . .	349
24.	The Collection and Processing of Hematopoietic Stem Cells . . . . .	355
25.	Umbilical Cord Blood Banking . . . . .	367
26.	Tissue-Derived Non-Hematopoietic Stem Cell Sources for Use in Cell-Based Therapies . . . . .	383
27.	Human Allografts and the Hospital Transfusion Service . . . . .	389
28.	Blood and Marrow-Derived Nonhematopoietic Stem Cell Sources and Immune Cells for Clinical Applications . . . . .	399
	Appendix. Laboratory Math . . . . .	413
