ix Preface

xi About the Authors

1. Accreditation, Regulatory Issues, Coding, and Reimbursement

- 1 QC of multiple reagent racks
- 2 E-mail and panic values
- 5 What are RTTIs?
- 6 What is the reimbursement coding for a canceled hematopoietic progenitor cell transplant procedure?
- 7 Zika virus and the *Circular of Information*
- 8 Autologous bone flaps

2. Apheresis

- 11 Does photopheresis cause thrombosis?
- 13 Should I use a TPE taper for TTP patients?
- 14 Differential effects of extracorporeal photopheresis
- 16 Leukapheresis efficacy
- 18 Does daily plasma exchange with albumin cause bleeding?
- 20 LDL apheresis and FSGS
- 22 Therapeutic apheresis for unusual conditions
- 25 ACE inhibitors and plasma exchange
- 28 What is the PLASMIC score?
- 29 Does the PLASMIC score really work?
- 30 Allergic reactions to albumin
- 32 Therapeutic plasma exchange and atypical HUS

3. Blood Donation/Collection

- 35 Determining eligibility of autologous donors
- 36 Can we modify the donor history questionnaire?

- 37 Slow pulse for an athlete donor
- 38 Variance for more frequent hemochromatosis donors
- 39 Docked ship time and vCJD deferral
- 40 Requalification of donors previously deferred for a history of viral hepatitis
- 42 Is blood from previously pregnant donors safe?
- 44 Can China's large population help alleviate blood shortages?
- 45 Are statistics available on blood donations worldwide?
- 46 Is there a standardized age limit for elderly donors?
- 47 Why do we have new hemoglobin qualifications?
- 48 Xenotransplantation and donor deferral
- 49 Attracting more donors

4. Cellular Therapy

- 51 Marrow transplantation safety and efficacy
- 52 Incompatible red cells in HPC products
- 53 Is there compensation for marrow donation?
- 54 Cell expansion in vivo?
- 55 Stem Cell Therapy Clinics

5. Immunoematology

- 57 Gel AHG crossmatch and ABO compatibility
- 58 Anti-CD38 and serologic interference
- 60 Anti-CD38 neutralization
- 60 Noninvasive fetal Rh type determination
- 61 Improvised red cell reagent preservative solutions
- 63 Which patients should receive antigen-matched red cells?
- 65 What is a "super Coombs" test?

6. Components and Derivatives

- 67 Unconventionally shaped blood bags
- 69 What is Liquid Plasma, and how can it be used?
- 70 Who has the freshest platelets?
- 70 Leukocyte reduction
- 72 Apheresis or whole-blood-derived platelets?
- 74 Are all platelet additives equivalent?
- 74 Albumin purity
- 76 Should cellular components be washed?

-
- 78 ADAMTS13 levels in different plasma products
 - 79 Alloimmunization after plasma transfusion
 - 80 Fresh Frozen Plasma and the INR
 - 82 Is there such a product as dried red cells?

7. Transfusion-Transmitted Disease

- 83 Does bacteria detection save lives?
- 84 CCIs with PR platelets vs untreated platelets
- 85 Do pathogen-reduced platelets function effectively?
- 86 Remaining confusion about PR platelets vs untreated platelets
- 87 PR platelets and septic transfusion reactions
- 88 What is the status of Babesia testing?
- 89 How soon is “as soon as possible”?
- 90 Identification, please!
- 91 How big a concern is transfusion transmission of CJD?

8. Transfusion Practice

- 93 Can blood warmers be used for platelets and cryoprecipitate?
- 94 Saline shortage
- 95 Skin blister formation with intravenous fluids
- 96 Can intraoperative blood recovery be used in cancer surgery?
- 97 Group A plasma for trauma patients
- 98 Can massive transfusion protocols be used for nontrauma patients?
- 100 Efficacy of granulocyte transfusion
- 101 Whole blood in massive hemorrhage
- 103 Diagnosing TACO
- 105 Transfusion-associated mortality
- 106 Platelet drip vs standard transfusion
- 108 Any updates on synthetic oxygen carriers?
- 109 RBC transfusion and heart attacks
- 110 Transfusion-associated microchimerism in trauma patients
- 111 Pediatric massive transfusion
- 113 Asymptomatic massive fetomaternal hemorrhage
- 114 Irradiating plasma components
- 115 Fibrinogen in postpartum hemorrhage

- 117 Switching plasma groups
- 119 D antigen alloimmunization risk
- 120 Hemolysis during running? Really?
- 121 Antibody testing after Rh Immune Globulin

9. Miscellaneous

- 123 Poop banking?
- 124 Are drones being used to deliver blood?
- 126 Hospice care and blood transfusion
- 127 “Young” blood and the fountain of youth
- 128 Tooth banking
- 130 Blood groups of mammals
- 130 Is there a standardized symbol for transfusion?
- 132 What is the oldest blood type?
- 132 What is “panda blood”?
- 133 Blue bloods
- 133 Cruise ship transfusions
- 135 What is confounding by indication?
- 136 Unexpected paternity
- 137 All-Electric Bloodmobiles
- 138 Myths and legends

141 Index
