

Table of Contents

Prefacexiii

About the Authors xv

Section I: Introduction

1. The Role of Metrics in Patient Blood Management 1

Richard R. Gammon, MD

Information Technology—A Key Stakeholder2

Using the Data Internally2

System-Wide Impact of PBM Data3

Summary3

References4

2. Overview of PBM Metrics 5

Robin Tauer, RN, MHA

Types of Metrics6

Types of Data Collection and Review7

How to Collect and Analyze the Data7

Creating Useful Reports9

3. Types of Metrics 11

Nanci Fredrich, RN, BSN, MM

Approaches to Acquiring Data 12

Today's Focus on Outcome Metrics 12

Effective Metrics 14

References 14

Section II: Data Collection

4. Building Provider-Specific Blood Utilization Metrics	15
<i>Nanci Fredrich, RN, BSN, MM</i>	
Why Group Like-Providers Together?	16
Accurate Data Reports	17
Presentation of Reports	17
Blood Utilization Metrics by Service Line	18
Use of Procedure-Specific Blood Utilization Metrics with Provider-Specific Data	18
Summary	20
References	20
5. Best Practice Advisories	23
<i>Richard R. Gammon, MD</i>	
CPOE, BPAs, and Compliance	23
BPA Advantages	25
References	25
6. Challenges of Getting Data	27
<i>Cheryl A. Richards, MT(ASCP)SBB</i>	
Data Sources	27
Challenges	28
If the Data Is Available	29
Summary	29
References	29
7. Effective Use of Dashboards	31
<i>Richard R. Gammon, MD</i>	
Identifying Useful Markers	31
Using the Case Mix Index	32
References	33
8. Use of Bubble Graphs	35
<i>Richard R. Gammon, MD</i>	
Capturing and Interpreting Three-Dimensional Data	35
Powerful Tools	37
References	38

Section III: Metrics: Before, During, and After Hospitalization

9. Hospital-Acquired Anemia	39
<i>Cheryl A. Richards, MT(ASCP)SBB</i>	
Definitions	39
Prevalence	40
Causes	40
Strategies to Reduce the Risk of HAA	40
Summary	42
Suggested Metrics	42
References	42
10. Compatibility Testing Before Surgery	45
<i>Cheryl A. Richards, MT(ASCP)SBB</i>	
Incomplete Testing	45
Excessive Ordering and Transfusion	46
Effective Communication	47
Summary	48
References	49
11. Metrics for Transfusion Thresholds and Other Guidelines	51
<i>Cheryl A. Richards, MT(ASCP)SBB</i>	
Background	51
Metrics	52
Summary	53
References	53
12. Red Cell Transfusion: Importance of Single-Unit Transfusions	55
<i>Nanci Fredrich, RN, BSN, MM</i>	
Promotion of Single-Unit RBC Transfusions	56
Difficulty in Changing Transfusion Practice	57
Summary	58
References	58

13. Checking Hemoglobin after Red Cell Transfusion 61
Nanci Fredrich, RN, BSN, MM
15-Minute vs 24-Hour Sampling 62
Summary 62
References 63

14. Vital Signs 65
Cheryl A. Richards, MT(ASCP)SBB
Frequency of Monitoring Transfusions 66
Audit Methods 67
Summary 68
References 68

15. Nursing Notes 71
Robin Tauer, RN, MHA
Vital Signs 72
Transfusion Start and End Times 72
Transfusion-Related Adverse Reactions 73
Informed Consent 73
Summary 73
References 73

16. Transfusion Reactions and Red Cell Transfusion 75
Richard R. Gammon, MD
Relevant Risks 75
Capturing Metrics on Transfusion Reactions 76
References 78

**17. Discharge Hemoglobin Levels as Markers for Excessive
Transfusion 79**
Richard R. Gammon, MD
Data Analyses 79
References 81

18. Discharge Instructions as a Tool to Collect Relevant Data 83

Robin Tauer, RN, MHA

Effective Use of the Document 83
References 85

Section IV: Analyzing Trends and Usage

19. Comparing Blood Utilization 87

Cheryl A. Richards, MT(ASCP)SBB

Comparison Metrics 88
Comparing vs Benchmarking 88
References 91

20. Blood Wastage—Metrics Can Precede Intervention 93

Cheryl A. Richards, MT(ASCP)SBB

Defining the Metric 93
Effective Use of the Data. 94
Summary 94
References 96

21. Use of Survey Tools for Metrics on Education 97

Richard R. Gammon, MD

Applications Vary—Three Examples 97
References 100

Section V: Presentation of Data

22. Delivering Presentations 101

Robin Tauer, RN, MHA

The Dashboard 101
How to Tell a Story 102
Summary 104
References 104

23. Distributing Data	105
<i>Richard R. Gammon, MD</i>	
Options for Presentation and Distribution	105
Peer Pressure Can Be Effective	108
A Final Word	109
References	111
Index	113
