PREFACE	vii
BLOOD COMPONENTS	1
Concept of Component Therapy	1
Red Blood Cells	6
Whole Blood	15
Platelets	16
Plasma Components	22
Cryoprecipitated AHF	29
Granulocytes	33
Patient Blood Management	38
References	38
ALLOIMMUNE CYTOPENIAS	49
Alloimmune Cytopenias Resulting	49
Immune-Mediated HDFN	49
Neonatal Alloimmune Thrombocytopenia	68
Neonatal Alloimmune Neutropenia	74
Alloimmune Cytopenias Resulting from Blood Transfusion Therapy	76
References	82
HEMOSTATIC DISORDERS	93
Overview of Hemostasis	93
Primary Hemostasis	93
The Procoagulant System	94
The Anticoagulant and Fibrinolytic Systems	96
Hemostasis in Neonates and Children	97
Evaluation of Bleeding	102
Hemostatic Disorders in Children	111
Disorders of Fibrinolysis and Anticoagulation	132

Factor Concentrates	136
References	145
ADVERSE EFFECTS OF BLOOD TRANSFUSION.....	161
Hemovigilance	161
Acute Transfusion Reactions	162
Delayed Transfusion Reactions	191
References	199
OVERVIEW OF SPECIAL PRODUCTS.....	211
CMV-Reduced-Risk Products/Components	211
Gamma- or X-Ray-Irradiated Components	217
Leukocyte-Reduced Components	221
Components That Are Negative for Sickle Hemoglobin	223
Washed and Volume-Reduced Components	224
Donor-Specific Units	227
Pathogen Inactivation and Pediatric Patients	231
Considerations on Age of Blood	232
References	233
SPECIAL PATIENT POPULATIONS	241
Neonates	241
Congenital Hemoglobinopathies Requiring RBC Transfusion	255
Extracorporeal Life Support in Children	262
Massive Transfusion and Life-Threatening Hemorrhage in Pediatric Patients	268
References	276
INDEX	291
