Preface	ix
1. BLOOD COMPONENTS	1
Concept of Blood Component Therapy	1
Whole Blood	5
Red Cell Components	7
Platelet Components	9
Granulocytes	16
Cryoprecipitated Antihemophilic Factor	23
Blood Component Modifications	25
Oxygen Therapeutics	36
Pathogen Inactivation	37
References	40
2. PLASMA DERIVATIVES	57
Factor VIII Concentrates	57
Factor IX Concentrates	66
Factor X Concentrate	67
Prothrombin Complex Concentrate	67
Other Recombinant and Plasma Protein Derivatives	68
Albumin and Plasma Protein Fraction	72
Synthetic Volume Expanders	74
Immune Globulins	76
Rh Immune Globulin	78
References	81
3. HEMOSTATIC DISORDERS	91
Overview of Hemostasis	91
Evaluation of Bleeding Disorders	95

Congenital Bleeding Disorders	102
Acquired Bleeding Disorders	123
Prohemostatic Drugs	134
Thrombotic Disorders	136
Disorders of Fibrinolysis	143
References	144

4. TRANSFUSION PRACTICES 163

Blood Ordering Practices	163
Urgent Transfusion	167
Hematopoietic Stem/Progenitor Cell Transplantation	168
Solid-Organ Transplantation	169
Obstetric Transfusion Practices	174
Neonatal Transfusion Practices	178
Pediatric Transfusion Practices	185
Management of Platelet Refractoriness	187
Administration of Blood	189
References	193

**5. PATIENT BLOOD
 MANAGEMENT 201**

Concept of Patient Blood Management	201
PBM Program Structure	202
Nonsurgical/Preoperative Issues	203
Perioperative Techniques	207
Postoperative Management	215
Transfusion Thresholds	216
Blood Utilization Review	217
Reducing Blood Wastage	218
References	219

6. TRAUMA AND MASSIVE BLEEDING	229
Overview of Massive Transfusion	229
Resuscitation in Massive Bleeding	230
References	244
7. ADVERSE EVENTS	255
Acute Transfusion Reactions	255
Delayed Transfusion Reactions	274
Transfusion-Transmitted Diseases	278
Hemovigilance	282
References	283
8. THERAPEUTIC APHERESIS	293
Overview	293
Indications	301
Procedural Considerations	309
Complications of Apheresis	310
References	313
Index	319
